

I was in Florida recently on one of my frequent visits to my daughter and her great young family. My son-in-law, Eric, (fortunately for me) is employed by the water plant. He informed me about this great new product, which is an Ultra-pure Polarized Water. Eric knows only too well just how uncomfortable I can become ... I must admit I was somewhat skeptical that something like this could help me but figured what did I have to lose by giving it a try. *I was diagnosed about eight years ago with a chronic neurological disorder* and have experienced the typical "roller coaster" of symptomatic problems that goes along with the illness. Right side tremors, rigid muscles, slow gait among others. To my surprise soon after I began drinking the water I noticed a marked improvement in my energy level. I also noticed that I didn't have as much difficulty with involuntary muscle contractions in my foot, which has been one of my most troublesome symptoms. I immediately began using your product daily and made sure to order some so that I could continue using it when I returned to Michigan.

I have now been using the water for five months and continue to benefit greatly from using it every day. I fully intend to continue with the use of this product and I will be sure to let you folks know about any additional progress and even failures although nothing negative has happened to date. I feel it is important to let you know my completely objective feelings and opinions about Polarized Water and update you with my progress. To this day I still have an amazing sense of wonderment with respect to the feelings of relief from some of my most troubling symptoms.

I also told my neurologist about the Ultra-pure Polarized Water and gave him a couple of bottles for him to do as he pleases. Or perhaps to try with some other patient ... I am very interested to find out if he has anything new to tell me about your wonderful product. I should let you know a little bit about my doctor. I feel very fortunate that he has agreed to help me manage my illness and with my significant "quality of life" issues. Dr. E. is a well-known specialist in chronic neurological disorders and limits his practice to the care and treatment of patients with this horrible and debilitating condition. In addition he is also a well-respected research scientist, with advance degrees in pharmacology as well as being one the top clinicians in this country in his field. So, I am very happy he will be taking a look at your product. I'm sure you can tell how grateful I am for his help.

OK, back to the business on hand. Mostly because of his own success with this product Eric, my son-in-law, made sure that I had a couple of complementary jugs of Polarized Water as soon as I arrived in Sebring, Florida. I could hardly believe what I experienced very soon after taking my first couple drinks of Polarized Water. The change in my physical feelings was IMMEDIATE but I wanted to wait a couple of days to see if the results of this experiment were real or imaginary. I am certainly not the type of person who would typically go out on a limb and declare a miracle. In fact I am just the opposite being very skeptical about most matters. To this day I still have an amazing sense of wonderment with respect to the feelings of relief from some of my most troubling symptoms.

Being the realist that lives inside me I must confess to some inner confusion about what I was experiencing once I began using the water each day. In most respects I tend to be pessimistic about things in general typically quick to over react to most situations. As the next few days progressed I continued to experience the same sort of relief from one day to the next and the next and so on. I was quickly becoming a real believer. As I stated before Eric gave me a couple of gallons of Polarized Water so that I could seek and hopefully find relief from some of my symptoms. I was hoping to find even a little bit of benefit or any help that may be gained by using the Polarized Water in my day-to-day activities.

Now, you must believe me when I tell you that I am not crazy enough to think that something as simple as drinking some water is a cure for this horrible affliction that myself and so many others that suffer from this debilitating condition, (many of them worse than me). For those that do not know or have never been around a person with this condition, it is a progressive illness. Simply said, it will never go away but to be sure it will get worse until it ultimately owns you. So you have to understand that any kind of help at all is a definitely a plus and certainly worth the effort. In my book, trying some Polarized Water for myself certainly couldn't hurt and made perfect sense. Who knows, maybe by some sort of miracle some relief could be experienced right now from using Polarized Water. So, the values of the Polarized Water product cannot be minimized and I am extremely grateful for all that you have done so far. Please don't stop your good work. We are anxiously waiting for that "next miracle." Hopefully you are postured to continue your good work and I wish you great success. Even if that does not happen in my lifetime you can still work toward helping others who will be in my place in the future.
