Home Beach of AquaNew's Watt-Ahh® Receives Prestigious Recognition

Sarasota, FL – TripAdvisor has discovered what we've known all along. Siesta Key Beach is among the best in the world. Recently, Siesta Key Beach was ranked no. 16 of the top beaches in the World by TripAdvisor's *Traveler's Choice 2013*. This comes on the heels of Stephen "Dr. Beach" Leatherman declaring Siesta Key Beach the *Best Beach in America* in 2011.

Siesta Key Beach has always been Watt-Ahh®'s home beach, for more than just its breathtaking Gulf of Mexico views and sugar-white sand. It's also home to an abundance of healthy negative ions.

Negative ions are believed to help promote feelings of well being, while boosting our immune systems, energy levels and mental acuity. "If someone cannot walk through the surf of Siesta Key Beach to absorb negative ions, the next best thing is drinking Watt-Ahh®." Said Watt-Ahh® inventor Rob Gourley.

Last month, AquaNew held a medical summit on Siesta Key when Gourley and other participating doctors and health practitioners presented their theory on the negative ions associated with Watt-Ahh® – similar to those created by nature, such as a lightning storm or waves crashing onto a beach. Gourley continued, "Our research is verifying the reason why Watt-Ahh® provides a feeling of well being. It's just like walking on a beautiful beach."

For more information about Watt-Ahh®, visit www.AquaNew.com or phone 888-936-AQUA (2782).
